RideTheBullCoin

Introduction

Created by experienced miners as a Meme Coin for crypto enthusiasts to participate in the excitement of the upcoming Crypto Bull Run and many more after.
Utilizing the Keep-It-Simple-Stupid “KISS” and the No BULLSH!T “No BS” approach, RTB is aimed to not overthink what is needed to enjoy a Crypto Bull Market: A strong blockchain, a wallet to store your coins, platform(s) for trading and of course, a strong community to enjoy together.

Unique Features

- ZERO (0) Pre-mine
- Utilizes AdaptivePoW
- Coinbase Maturity of 180 blocks.
- Fast/Often Block Reward Reductions

Coin Information

- Max Supply: Approx. 37,000,000
  (10 Years until end of Mining Rewards)

- Block Reward Reductions: 17.6% Every 129,000 blocks (Approx. 3 Months)

- Coinbase Maturity= 180 blocks

- Collection Address: 1% of every block for Development/ Exchanges/Marketing/ Airdrops
  (Address of wallet is published in our Discord)

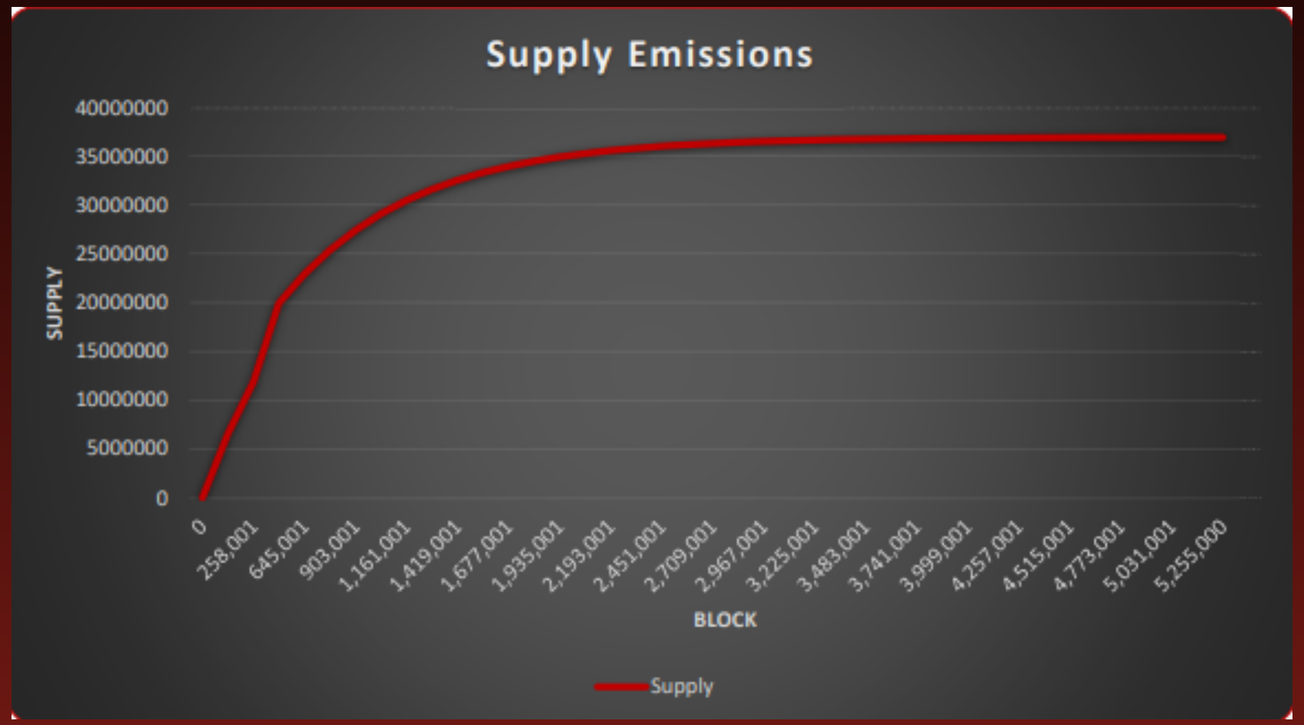
POW Mining

- Equihash 200,9 Algorithm
- 1 Minute Block Time
- Initial Block Reward : 50 RTB

Official Mining Pool 1:
https://pool.ridethebullcoin.com

Official Mining Pool 2:
https://pool2.ridethebullcoin.com

Coin Emmisions



As you can see, reductions will happen quickly, approximately every 3 Months.

RTB Burning

We incorporated a burn address that is proven to be unspendable. It contains a null pubkey which proves the RTB coins in that address cannot be spent, therefore “Burned”

Current RTB Trading Options

Discord Caldera OTC Trading Bot

Komodo Wallet

*CEX Listings TBD
